Title Index

Acetyl cellulose replica technique, 437
Aluminum alloy X8001, hardness and microstructure of, 243
Aluminum-uranium alloys, solidification and segregation in, 165
Axial ratios, 79

Beryllium, electrolytic lapping, 5
Beryllium foils, preparation and electron microscopy of, 431
Beryllium, metallographic preparation of, 431
Bioden replica technique, 437

Canyon diablo meteorite, metallography of, 287
Carbide fuels, uranium-plutonium, 19
Carbide precipitates in molybdenum, 195
Carbon, effect of vibratory polishing on appearance of, 237
Cd-Au, axial ratios, solubility limits, 79
Cd-Li, axial ratios, solubility limits, 79

Delta-stabilized Pu alloys, percent of alpha in, 387
Diffusion-controlled Ostwald ripening, 349

Electrographic methods, field ion micrographs by, 91
Electrolytic lapping of beryllium, 5
Electron microscopes, image contrast, 109
Electron microscopy, jet-machining specimens for, 233
Electron microscopy of Be foils, 431
Electron microscopy of tungsten selenide, 227
Electron probe, inclusion identification, 55
Electropolishing tin and tin-lead alloys, 455
Epoxy technique for specimen preparation, 425
Etching facets in a magnesium alloy, 449

Field ion micrographs, direct recording of, 91

Grain diameters of magnesium oxide, 333
Growth processes, quantitative metallography of, 35

Hardness of X8001 aluminum alloy, 243
Hot stage metallography, 157
Hydrofluoric acid lens damage, 149

Image contrast in electron microscopes, 109
Inclusions, microprobe analysis of, 55
Iron-nickel, hot stage metallography of, 157
Irradiated materials, replication of, 443
Irradiated specimens, metallography of, 303

Jacquet, Pierre, biographical note, 1
Jet-machining disc specimens, 233

Lead base alloys, the microstructure of, 399
Lenses, hydrofluoric acid damage, 149

Magnesium alloy, etching facets and orientation of, 449
Magnesium oxide, grain diameters of, 333
Meteorite, study of canyon diablo, 287
Microprobe, analysis of particles with, 221
Microscopic contrast, increasing, 153
Microstructure of X8001 aluminum alloy, 243
Microstructure of Pb base alloys, 399
Microstructure of α-Pu, 365
Microstructure of superalloys, 251

Molybdenum, orientation of precipitates in, 195
Mounting specimens, resin-impregnation method for, 439
M_s temperatures in iron-nickel, 157

Nitride precipitates in molybdenum, 195
Nucleation, quantitative metallography of, 35

Orbital grinder-polisher, 303
Orientation and habit plane relationships, 195
Ostwald ripening, 349

Particle density, measurement of, 25
Particle size distributions in Ostwald ripening, 349
Particles, microprobe and X-ray analysis of, 221
Plutonium alloys, X-ray method for % alpha in delta, 387
Plutonium (α), the microstructure of, 365
Polarized etching facets in a magnesium alloy, 449
Polish, chemical-mechanical, for tungsten, 249
Polishing, vibratory, 237
Polycrystalline magnesium oxide, 333
Precipitates, carbide and nitride in molybdenum, 195
Preparation, metallographic, of RDX in TNT, 341
Preparation of Be foils for electron microscopy, 431
Preparation of beryllium for microscopy, 431
Preparation of irradiated metallography specimens, 303
Pyrolytic carbon coatings, 237

Qualitative metallography of uranium-plutonium, 19
Quantitative metallographic methods, 35

RDX-TNT, metallographic preparation of, 341
Replicas, extraction, 25
Replica technique, new, 437
Replication of irradiated materials, 443
Resin-impregnation method of specimen mounting, 439

Solidification and segregation in aluminum-uranium alloys, 165
Solubility limits, 79
Specimen mounting, resin-impregnation method for, 439
Specimen preparation, epoxy technique for, 425
Superalloys, the microstructure of, 251

Thin coatings, technique for preserving, 425
Tin and tin-lead alloys, electropolishing of, 455
Tungsten, chemical-mechanical polishing of, 249
Tungsten selenide, electron microscopy of, 227

Uranium-plutonium, qualitative metallography of, 19

Volume fraction, measurement of, 25

X-ray analyzer, analysis of particles with, 221
X-ray methods for Pu alloys, 387

Zn-Li, axial ratios, solubility limits, 79

Printed in Belgium
